### **EXAMINER'S AMENDMENT**

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or disclose a circuit arrangement for starting and operating discharge lamps comprising, in combination with the remaining features of the claims, a preheating resistor, which brings about damping of a resonant circuit via electrode filaments during a preheating phase, with the effect that the resonant frequency of the resonant circuit is reduced from a natural frequency to a damping resonant frequency, wherein in the event that a first electrical variable inputted into a controller assumes the starting value, the controller brings about an inverter frequency which lies between the damping resonant frequency and the natural frequency and in the event that the first electrical variable lies above a minimum value, the controller brings about an inverter frequency which leads to a desired lamp current or lamp power.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Vu whose telephone number is (571) 272-1831. The examiner can normally be reached on M-F 8am-430pm.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
